

A Volunteer Restoration Workday

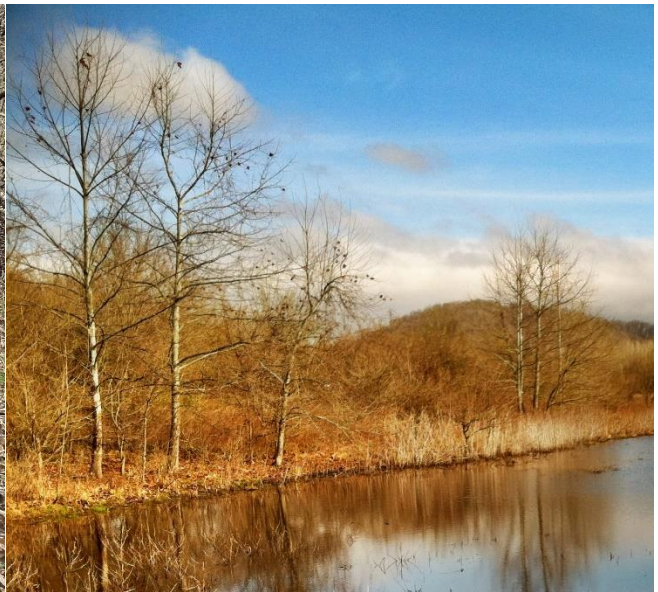

Middle Island—St. Mary's West Virginia

(Part of the Ohio River Islands National Wildlife Refuge)

Hosted by the Friends of the Ohio River Islands NWR

When: Sunday, September 11th, 1-4 PM

Where: Meet at the parking lot on island near refuge buildings, about 1 mile along the gravel road from the bridge (Bridge address is 100 George St, St. Mary's WV)

- Come join volunteer stewards in removing invasive plant species at Middle Island. Removing these invasive plants will allow native critters and plants a chance to flourish on this restored bird and wildlife sanctuary.
- No previous experience is necessary! We will provide work gloves, tools and snacks for the workday. Learn about plants, birds, and wildlife at this beautiful Ohio River Island (one of the few that has easy access by car.)
- Dress for working outdoors in weeds and shrubs: good work shoes, long pants, and long-sleeved shirts!
