

CITF Project Report December 2022

Solar Bench

I have not followed up on the wifi. The mayor has not chosen a date for dedicating the bench. A sign explaining the bench and its functions is a good idea.

Pollinator Habitat

- The big news is that the city has agreed to replace the deteriorating staircase and create a paved path linking the habitat to the Harmar river trail; we also have tentative approval for a bench at the city's expense, but that is not yet confirmed. Once there are details, we can submit the updates to Dupont.
- The Broughton Preserve has donated seeds of various native species for the habitat. **Needed:** volunteers for winter sowing.
