

CITF Project Report January 2023

Solar Bench

The wifi on the bench has not been functioning. After Mike Bailey contacted Engo, they sent a replacement router. Unfortunately, the router compartment was inaccessible. I contacted the city public works department and learned the location of the access tool. Mike agreed to pick it up.

Pollinator Habitat

The mayor has communicated that the city should be able to replace the staircase and add a paved link between the habitat and the Harmar River Trail. No details at this time.
